PROJECTS

Quasi-Bound

- 3D Card game which allows users to upload unique cards using a stat allocation algorithm
- Configured a client component using React which allowed users to manipulate cards and create new ones
- Included front end components as well as back end API calls

ShowNTell

- Reddit-like application for discussing TV Shows
- Built a search function which implemented a third-party API to search for a TV show
- Created the subscription page using React which displayed the user's subscribed shows
